

Hello

Welcome to issue 36 of Hazcheck News.

We hope you enjoy reading the newsletter!

Amendment 40-20 version of Spanish Dangerous Goods Transport General Awareness course now available!

The [Dangerous Goods Transport General Awareness course](#) is for those who need a familiarisation with dangerous goods transport regulations and an awareness of the duties that arise from them. It fully meets the awareness training requirements in 1.3.1.2.1 of the IMDG Code (Amdt 40-20), 1.3.2.1 of the ADR Agreement and RID Regulations and also highlights requirements in the air transport regulations and the 49 CFR domestic dangerous goods regulations.

Now available in both **English** and **Spanish**, it is ideal for warehouse personnel, clerical workers, administrators, managers, customer service and/or sales personnel and others who have a very limited direct involvement in dangerous goods shipping or transport activities but need a general appreciation of the regulations.

All course content is 100% online and there is a course completion certificate. IMDG Code e-learning is a [Certified Det Norske Veritas Learning Programme](#). Prices start at GBP 69 for one course.

National Cargo Bureau celebrates 70 years of helping to enforce regulatory advancements with a mission of Safety of Life and Cargo at Sea

Exis Technologies parent company, [NCB](#), is proud to be celebrating its 70th anniversary this year. Over the past 70 years NCB has helped to enforce important regulatory advancements with its mission of the Safety of Life and Cargo at Sea. NCB is mentioned in several of the Code of Federal Regulations. Certificates issued by NCB for bulk cargoes may be accepted as evidence of compliance with the IMBSC Code and US regulations under 46 CFR.

Since 2018 when Exis became part of the NCB Group, the two companies have joined forces to tackle the issues at the root of ship fires, like poor stowage and misdeclared/undeclared DG with new digital solutions. [Hazcheck Inspections](#), the web-based container inspections database now has an excess of 100,000 data records and CTUs can be inspected remotely using their new remote inspections capability using mobile phones to capture data. [Hazcheck Detect](#), the realtime cargo screening tool now used by Maersk, ONE and Hapag Lloyd is allowing non-compliant cargo to be viewed within seconds, stopping it from being loaded onto ships (40-50 containers each week).
