

Multilingual Dangerous Goods Transport General Awareness Course

General awareness training is a requirement in most of the dangerous goods' regulatory texts. If we look at the IMDG Code as an example it requires each person to be '*trained in order to be familiar with the general provisions of dangerous goods transport provisions*'. This training must include a description of the classes of dangerous goods, packing, labelling and marking of packages, placarding and marking of CTUs, documentation and transport operations including emergency response. This requirement is replicated in other regulatory texts.

NCB Hazcheck **Dangerous Goods Transport General Awareness Course** meets these training requirements included in the IMDG Code, ADR and RID Agreements, 49CFR (US) domestic regulations and also covers some of the requirements for air transport.

In addition, the same course is available in English, French and Spanish languages allowing consistent training in multiple locations.

It is ideal for warehouse personnel, clerical workers, administrators, managers, customer service and/or sales personnel and others who have a very limited direct involvement in dangerous goods shipping or transport activities but need a general appreciation of the regulations.

Further details and online ordering is now available at [Dangerous Goods Transport General Awareness Course](#)

Stay informed with the IMDG Code

Keeping up with the latest version of the International Maritime Dangerous Goods (IMDG) Code is crucial if you're involved in shipping hazardous materials by sea.

To improve safety and compliance with global requirements, the code is updated on a regular basis. Maintaining awareness lowers liability risks, enhances safety precautions, simplifies operations, and helps you comply with international shipping laws.

To stay informed, subscribe to notifications, attend training sessions, consult industry resources, regularly review the code, and network with peers in the field. All parties involved in the supply chain have an overall obligation to guarantee the lawful and safe maritime transportation of hazardous materials.

IMDG Code Change Checklist

When a new version of the International Maritime Dangerous Goods (IMDG) Code is released, it's essential to ensure compliance and safety in sea transportation.

Key aspects to check include the effective date, regulatory changes, classification updates, packaging requirements, labeling, documentation, training, and emergency response procedures. Stay attuned to transitional provisions, communication channels, industry guidance, and consider consulting experts for specific concerns.

Don't forget to regularly monitor updates, implement necessary changes, and educate your personnel to ensure the safe and lawful transportation of dangerous goods by sea, seamlessly aligning with international regulations.

The next generation of Hazcheck, launching in 2024

In 2024, NCB Hazcheck will officially launch our next-generation Hazcheck platform, a comprehensive software suite for regulatory enquiry, validation, and analytics. Further updates will be provided throughout the year and our Customer Success team will be in touch with Hazcheck customers migrating to our new system.

We are pleased to extend early access opportunities to our valued customers. This exclusive invitation ensures that you are among the first to explore the cutting-edge capabilities of the Hazcheck platform. To schedule a personalized demonstration and witness first-hand the capabilities of our new platform, please do not hesitate to contact us at Services@hazcheck.com.

We anticipate a seamless transition and are confident that Hazcheck will facilitate an enhanced operational journey. We will keep you informed with regular updates.
